SUMMARY

Results-driven web developer with extensive experience in supporting entrepreneurs and clients across the hotel, logistics, and wholesale sectors. I have successfully initiated and developed various projects, including commercial HTML letters, a customer feedback app for hostels, a website for accounting businesses with integrated Google Analytics, and a B2B online shop for household chemicals. Proficient in Next.js, TypeScript, and Mongoose, I also possess backend development experience using Node.js (Express). I am committed to continuous learning, having completed multiple courses independently. My English proficiency was honed through my work in online gambling, where I provided commentary on sports events and hosted shows with British colleagues, gaining solid experience in client support.

EXPERIENCE

Freelance Web Developer

Self-employed

📅 2023 - Present 📍 Latvia

Company Description

- Developed and launched various web projects for clients in the hotel, logistics, and wholesale sectors, enhancing their online presence and customer engagement.
- Created commercial HTML letters that improved client communication and marketing efforts.
- Designed and implemented a customer feedback application for hostels, streamlining guest feedback collection and analysis.
- Built a website for an accounting business, integrating Google Analytics for performance tracking and insights.
- Developed a B2B online shop for household chemicals, focusing on user experience and functionality.

Volunteer Web Developer

Self-employed

📅 2023 - Present 📍 Latvia

B-Bar

- Assisted in troubleshooting and debugging issues, improving overall site performance.
